CHRISTIAN RADIO MISSIONARY FELLOWSHIP

*Enabling the Church and People of PNG through
Radio Communication and Technical Services*

VSAT

Any mission organization wishing to purchase or requiring any advice regarding VSAT can now receive help directly from the CRMF office. For any help or advice please contact Michael Wakefield or George Hatave.

Fetching Fees

These fees are normally payable in advance on 1 July each year. We are going to change this billing to make it easier for ourselves and we hope our customers. We will now be billing for HF email fetching fees in January of each year.

Since our customers have already been billed till June 07 we will be billing again in February for only a six month fee to complete the 07 calendar year to 31 December. When you pay this bill you will be fully paid up till the end of 2007. If you do not pay this bill by 30 Sept this year then your connection will automatically be disconnected here at CRMF.

In January 2008 we will again bill you for a full year for 2008. Those customers coming on to HF email during 2007 will be billed for the portion of the year remaining at the time of connecting to this service.

Network Fees

This fee will now be payable on a one off basis when a new radio is purchased or when CRMF frequencies are programmed into a radio. This will apply to VHF and HF Radios.

Comings and Goings

Norm. and Chris. Turtle are on furlough until early September. They have been replaced for 6 months by John and Sue Steendam from Melbourne Australia, who have now been working with the CRMF team since early February 2007.

Ruben Simon, a student from Germany has also been part of the CRMF team. He is doing an assignment as part of his university studies. He has also been helpful on the bench in the workshop, in IT and in many other areas.

The Wakefield family returned earlier this month with their new addition, a baby daughter Mikaela Amity.

Eric Adagasi will be starting work experience with CRMF later this month in the technical area, we wish him well as he joins our team.

David Ahokare has completed his studies at Lae Unitech and has just graduated, receiving a Degree in Computer Science. Congratulations David well done.

Paul Lihofi has resigned from CRMF after 12 years of faithful service, we will miss “big Paul” and wish him God’s Blessings and guidance for his future.

Paul Zulu has recently joined CRMF and has taken on the position of property maintenance. We wish “little Paul” success and hopes he will enjoy working with us.

Second hand HIGH Band VHF Radios

We have been able to secure some second hand VHF radios. If any mission or church has need of them please contact Bryan

Second hand HF radios

We have some second hand 8727, 8525B and 9323 radios. Both of these types can be modified for data. They range in price from K2500 to K8000. Contact Bryan if you are interested in knowing more. Our preference is to make these radios available to national churches.

Training for Radio installations & maintenance

We will cease all installations and training during election time. From early May through to mid. August. This will help reduce any risk to our technicians while travelling during this time.

LED's for the Bush

We have introduced a range of LED 12v lights which offer light at very efficient consumption of battery power. Ask Bryan or Michael for the technical details.
